FOOD AND SUSTAINABILITY:
BUILDING OUR FUTURE**

by

BARILLA CENTRE FOR FOOD & NUTRITIONwww.barillacfn.com

Comment: In this complex world of trying to ensure quality food for ALL, for a fast growing global population, the book is timely. It has contributions from world renowned experts covering broad areas of food and nutrition security, environmental sustainability, culture and urges all of us to rally around these issues as they concern everyone regardless of geography or age.

Eating Planet makes good reading.
