

Allergy-immunology glossary

Sally G. Mohamed, Zeinab A. El-Sayed

Pediatric Allergy and Immunology Unit, Children's Hospital, Ain-Shams University

Towards a clear designation of some of the terms used in allergology and immunology.

Health-related quality of life (HRQOL)	Health-related quality of life is a multi-dimensional health outcome concept that includes domains related to physical, mental, social, and psychological aspects of functioning and well-being that includes both positive and negative aspects. It is an important component in the measurement of efficacy, that focuses on the impact health status has on quality of life. ¹	جودة الحياة المرتبطة بالصحة
Child Health Questionnaire (CHQ)	Child Health Questionnaire is an international, validated, and generic health-related quality of life measurement instrument for children and adolescents ages 5–18. There are both parent-reported and child self-completed versions of varying lengths (CHQ-PF50, PF28, CF87 and CF45). ²	استبيان صحة الطفل
Holistic approach	Holistic approach is actually an approach to life that considers the whole person and how he or she interacts with his or her environment. It emphasizes the connection of mind, body, and spirit to achieve maximum well-being, where everything is functioning the very best that is possible. ³	نهج شمولي
