

**THE 10<sup>th</sup> ANNIVERSARY OF THE JOURNAL OF FUNDAMENTAL AND APPLIED SCIENCES**

Professor Touhami LANEZ

University of El Oued, Faculty of Sciences, VTRS Laboratory, B.P.789, 39000, El Oued,  
Algeria

Dear colleagues,

By releasing the volume 11, Issue 3 on the 1<sup>st</sup> of September 2019, we mark the 10<sup>th</sup> anniversary of the Journal of Fundamental and applied sciences (JFAS); we want to share with you this very special celebration. On behalf of JFAS's Editors, Editorial Board, and on my own, we thank you heartily for your continuous support. Without the support we have received from you and from many other colleagues from all over the world, this moment would not have come.

JFAS was founded by Professor Touhami LANEZ and published its first paper on the 31<sup>st</sup> of December 2009 (Ferouani A K and Inal M K. Spectroscopic diagnosis in electronic temperature of photoionise plasmas. J Fundam Appl Sci. 2009, 1(2), 1-12). In the past ten years, JFAS has continued to mature and expand as a high quality multidisciplinary journal and has established itself as a truly unique publication among the many peer reviewed multidisciplinary journals. In 2020 and in the foreseeable future, we will maintain this uniqueness and continue to publish high quality reviews and research articles in the diverse areas of sciences of matter, engineering sciences, life sciences, Medicine, Dentistry, Pharmacy, and Health Sciences.

The editor-in-Chief hope to commemorate this anniversary by publishing a special issue composed of research articles and reviews from a number of distinguished authors.
