

# Aspects of the Work of the Valley Trust

## WITH PARTICULAR REFERENCE TO THE REDUCTION OF KWASHIORKOR – PRELIMINARY REPORT

H. H. STOTT

### ABSTRACT

An outline of the causes of malnutrition in the Valley of a Thousand Hills was given, and the Valley Trust socio-

medical approach to the problem<sup>1</sup> was presented and illustrated by a series of colour slides.

A steady decline in the number of kwashiorkor patients presenting at the medical clinic was described and discussed in the light of the intergrated clinical, educational and agricultural approach over the past twenty years.
